Aerial View - South  
*May 2017*

An aerial photograph showing a large construction site for Fairview Elementary. The site is a rectangular area of cleared land, mostly brown dirt, with some darker patches of soil. Several orange excavators and a yellow bulldozer are visible working on the site. A red dump truck is parked near the center. The site is surrounded by a blue chain-link fence with orange safety tape. To the north of the site is a large, two-story brick building with a flat roof, likely a school. To the east is a large, single-story white building with a flat roof. A multi-lane highway with several cars and trucks is visible in the background. The foreground shows residential houses and trees.

*June 2017*

An aerial photograph showing the construction site for Fairview Elementary. The site is a large, cleared area of brown earth with some concrete foundations and rebar visible. An orange excavator is working in the lower center. To the left is a large blue and white industrial building. To the right is a parking lot with several cars and a row of white portable toilets. In the background, a multi-lane highway runs horizontally, with a grassy area and a small pond above it. Residential houses and trees are visible on the left and right sides of the site.

*July 2017*

An aerial photograph showing the construction site for Fairview Elementary. The site is a large, cleared area of brown earth, enclosed by an orange safety fence. Inside the site, there are several excavators, including a prominent yellow one in the foreground, and various construction materials like lumber and concrete blocks. To the north of the site is a large, modern-looking building with a blue and white facade. To the east, there's a parking lot filled with cars and a few small white buildings. A multi-lane highway with several buses and cars is visible in the upper right. The surrounding area includes trees, other buildings, and a small pond in the distance.

*September 2017*

An aerial photograph showing the construction of a new building at Fairview Elementary. The central focus is a large structure with its wooden frame exposed, featuring a grid of beams. To its right, a smaller, partially completed concrete building stands. A yellow crane is positioned near the wooden frame. The site is surrounded by various construction materials, including stacks of lumber and concrete blocks. In the background, a large, multi-story blue building with a curved roof is visible, along with a parking lot filled with cars. The foreground and sides of the site are lined with trees, some of which have vibrant autumn foliage in shades of red, orange, and yellow. The overall scene depicts an active construction project in a suburban setting.

*October 2017*

An aerial photograph showing the construction of a new building at Fairview Elementary. The site is located between an existing brick school building on the left and a large parking lot on the right. The new building's foundation and lower walls are visible, with some sections covered in orange safety fencing. A large pile of dirt and construction materials is in the foreground. Various construction vehicles, including excavators and trucks, are present. In the background, there are more school buildings, a blue tarp-covered structure, and a grassy area with trees.

*November 2017*

An aerial photograph showing the construction of Fairview Elementary. The main building is a large, rectangular structure with a flat roof. The roof is partially covered with orange corrugated metal sheets, while other sections are dark grey. The building's exterior walls are a mix of light-colored concrete and blue and green panels. To the left of the main building is a smaller, older brick building. To the right is a parking lot with several cars and a small house with a swimming pool. In the background, a multi-lane highway runs horizontally. The ground around the building is dirt and covered with construction materials, including stacks of lumber, concrete blocks, and various pieces of heavy machinery like excavators and trucks. A large pile of blue tarp-covered material is visible near the highway. The overall scene is one of active construction in a suburban setting.

*December 2017*

An aerial photograph of Fairview Elementary school during its construction phase in January 2018. The main building is a large, multi-winged structure with a dark roof and blue and orange exterior panels. A large section of the roof is covered with blue insulation. To the left, there is an existing brick building with a grey roof. The school is surrounded by a parking lot filled with cars and trucks, and a construction area with various materials and equipment. A multi-lane highway runs along the top of the image, and residential houses are visible in the bottom left corner.

*January 2018*

An aerial photograph of Fairview Elementary school during its construction phase in February 2018. The school building is a large, multi-winged structure with a complex roofline. The roof is primarily white, with several sections of blue corrugated metal roofing already installed. The exterior walls are a mix of brick and light-colored panels. The construction site is active, with various pieces of heavy machinery including excavators, cranes, and trucks visible. Large stacks of construction materials like lumber and bricks are piled up in the foreground. To the left of the main building is a large, older brick building with a flat roof. To the right is a parking lot filled with cars and a few trucks. The surrounding area includes other commercial buildings, a road, and patches of snow on the ground and rooftops.
