TROUTDALE ELEMENTARY CONSTRUCTION UPDATE

SEPTEMBER 2018

Welcome back to school, Tigers! We hope you had a great summer break and are enjoying your new school. A lot happened while you were gone including taking down the old school, paving the parking lots, installing the playground equipment, and much more!

Tearing down your old school took about a week to get all the walls down. Afterwards they cleared the debris and backfilled the basement, making the ground level, by crushing and reusing the existing rock/concrete onsite.

Photos after the school was demolished:

Work inside the school included finishing casework, painting, and installing the gym floor, kitchen equipment, elevator, signage, and the custom mural in the lobby.

Outside the parking lots were poured, the play equipment and rubber flooring were installed, and grass and trees were planted around the school.

You will still see us onsite through the end of October as we finish up the ball field, staff parking lot, and miscellaneous items throughout the building. We are so close to the finish line!

“Thank you for trusting us to build your new school! We are so pleased with how it turned out. The efforts and dedication of everyone involved is reflected in the finished product.”
