

Reynolds School District

Long-Range Plan

2011-2015

The Reynolds School District

High quality organizations are deliberate in their plans and actions to achieve long and short range goals. This long range plan is designed to enable the Reynolds School District to reach its goal of higher achievement for all students.

The driving force in the work of all staff in the Reynolds School District is the belief that every child will graduate from high school with the skills to choose to attend college; obtain employment in the trades or military; or enroll in post high school training. To achieve this goal, we pledge to provide students with rigorous and relevant learning opportunities in core academic areas as well as other essential disciplines such as the arts, physical education, wellness, and a range of extracurricular activities.

This long range plan begins with a framework for thinking about how to ensure that all aspects of district work support an excellent education for our students. The district goals of high student achievement, financial health, and communication are embedded throughout the initiatives that are organized by strategic areas.

An important aspect of this plan is the emphasis on equity for all students in our diverse community. We believe that our work to assure equitable outcomes begins with providing equitable educational opportunities and supports for all students. This requires that we also provide professional development and supports for teachers and staff in a collaborative working environment.

The plan should be seen as a living document that is used as guide for staff and a communication tool for the community. Each year, outcomes will be measured and reported to the staff and community. Initiatives will be examined, revised, and prioritized as determined by the district staff and the School Board. This plan also clearly shows the commitment and hope of the entire Reynolds community to achieve an excellent education for our students.

Values and Beliefs

- All students are capable learners who meet or exceed all learning standards and graduate ready to participate in our democratic republic.
- Diversity is positive and contributes to the comprehensive education of all students.
- Every adult within the school district is a role model for citizenship and learning.
- Effective learning environments assure students feel personally engaged and respected.
- In an equitable school system, all students have access to rigorous, relevant programs and the full range of enrichment activities.
- Families are partners in the education of all children.
- A fair and just public school system is the heart of our democratic republic.

Purpose of this Plan

Our primary purpose is to educate all students. By the end of elementary, middle and high school, every individual student will meet or exceed learning standards and all students will graduate fully prepared for college and career.

The plan defines specific areas for improvement and development and identifies the people responsible to lead the improvement process. Each improvement project will involve input from a wide-ranging representation of staff. The contributions of administrators, teachers, specialists, classified staff and community will be valued throughout the improvement processes.

Board Goals

- Increase student achievement.
- Increase fiscal responsibility.
- Increase internal and external communication.

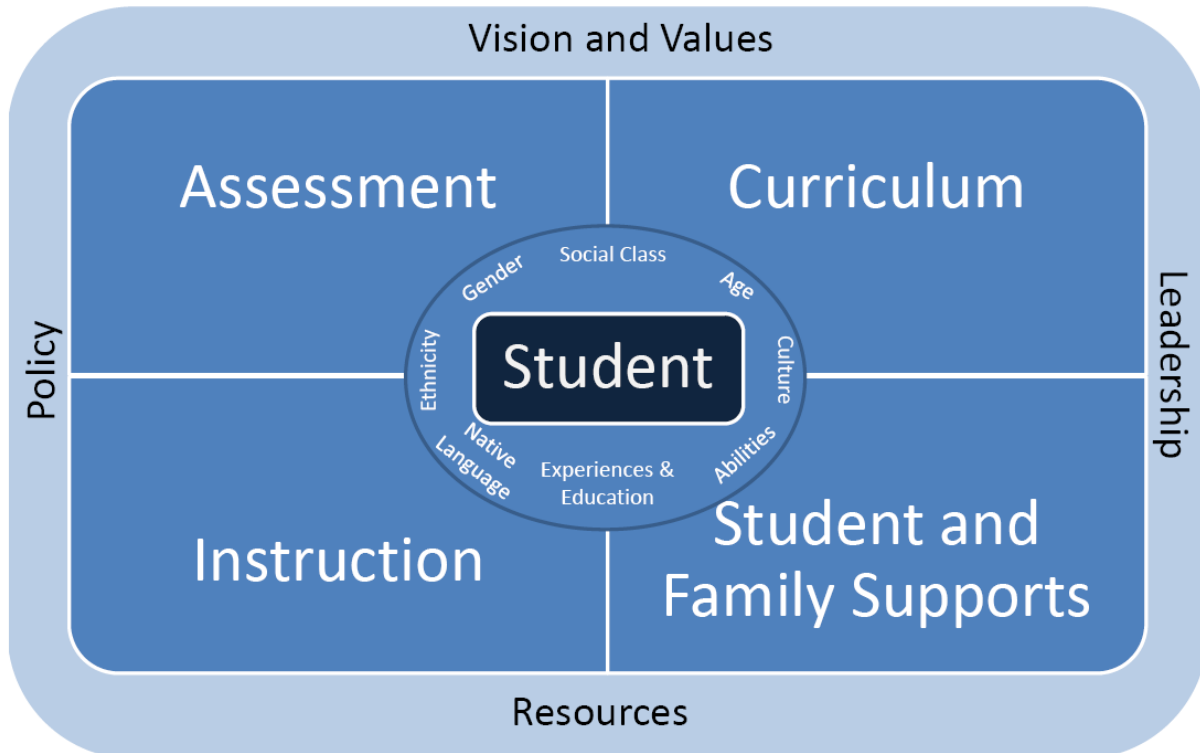

Objectives

The Long-Range Plan 2011-2015 serves three primary objectives:

- Provide an **action** plan aligned with board goals for the District over its effective term.
- Serve as an **accountability** tool to measure progress toward our objectives.
- Provide **information** to the community regarding district action and progress.

Framework for Student Achievement

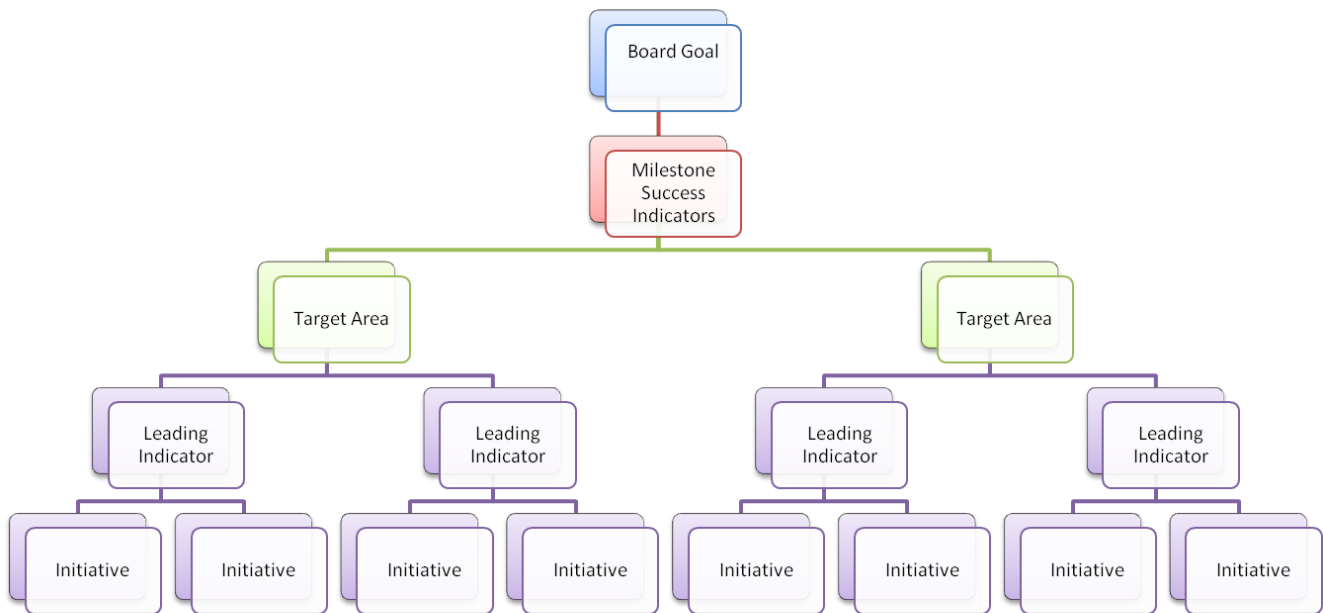

The Reynolds School District Framework for Student Achievement provides a mental model of how we operate. Students must always be the center of our thinking and instruction will be tailored to address the individuality of each student. The education we provide students includes best practice in curriculum, instruction, assessment, and supports for students and families. Variables that affect our work are vision, values, leadership, policy, and resources.

As a model, this same quadrant framework provides structure within each of our strategy areas—Equity, Teaching & Learning, Human Resources, Student & Family Supports, and Resources. The quadrants for each strategy area provide outcomes that drive our strategic plan. A clear focus with full system alignment is essential.

All Systems Aligned

Our primary purpose is to educate all students in an efficient, effective and equitable education system. In order to achieve this, the Reynolds School District long-range plan is based on setting goals and measuring our progress at multiple stages. Leading indicators provide information about progress toward broad, strategic goals. Success indicators measure whether we have reached our goals.

Milestones: Key Measures

Milestones are “success indicators” we use to identify where the Reynolds School District is in relationship to the expectations we set for ourselves. The measures expressed here are quantitative goals pertaining to test scores, grade and graduation rates.
