

Article 27 – Administrative Accountability

If the ratio between administrative employees and classified employees of the school district increases by 1%, the district will provide the union and Reynolds School District Community with a narrative and supportive quantitative data as to why an increase was necessary. In addition, using the school year 2011-2012 as the base year, the District will provide to the union and Reynolds School District Community a narrative and supportive quantitative data for each successive school year where increases of administrative personnel costs exceed the Portland Consumer Price Index.
