

**Telehealth  
Services  
Now  
Available**

**Ask your school nurse or counselor for more information**

**Multnomah County Student Health Center's Telehealth Service** is a convenient way for your child to receive medical and behavioral health care virtually at H.B. Lee Middle School.

**Telehealth visits** can treat:

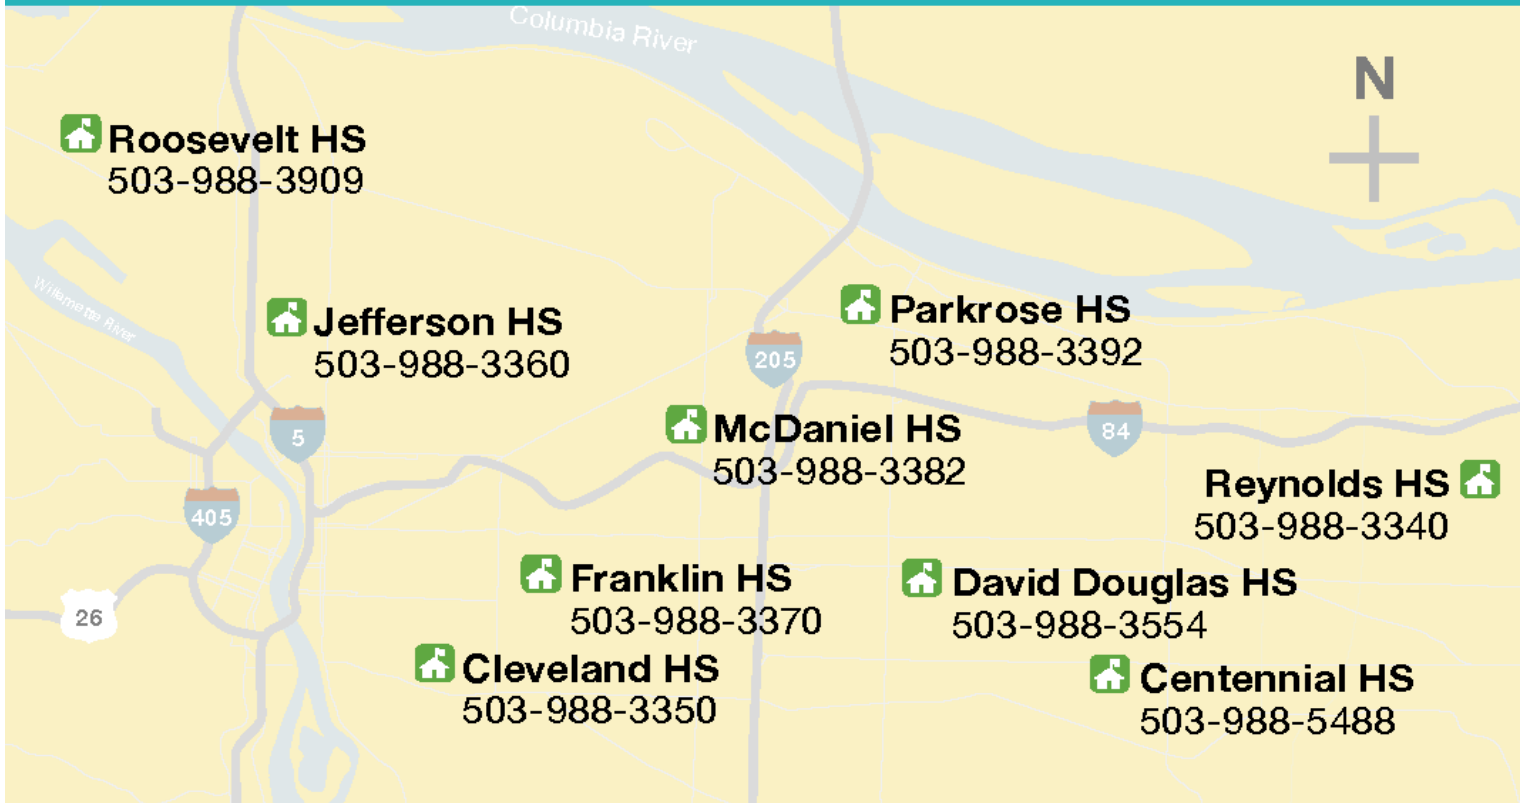

- Certain less serious illnesses (colds, sore throats, earaches, headaches, dental pain, and vision problems)
- Abdominal pain (nausea, vomiting, diarrhea)
- Upper respiratory tract disease
- COVID symptoms
- Counseling, emotional support and more!

By providing care at school, Student Health Center Telehealth Visits save time away from work or family. You also save money on gas, public transportation fares, and parking costs.

These new telehealth services are part of Multnomah County's existing Student Health Center program, which has clinics in 9 high schools throughout the county.

**We serve all Multnomah County youth ages 5-18 regardless of where they go to school. There is never an out-of-pocket costs for our services, and we will see you with or without insurance.**
