

Reynolds High School

Human Anatomy & Physiology

Building Relationships for Academic Success

Instructor: Eric Wergeland

Phone: 503-667-3186 x1150

Room Number: 200

Email: ewergeland@rsd7.net

Sem 1 and 2: 1.0 Science Credit

2nd Lunch

Required Textbooks/Materials: Binder, paper/ notebook, pencil/pen, Chromebook

- Text: Essentials of Human Anatomy and Physiology by Elaine Marieb
- Available in class as needed (some copies in library for you to check out for use as home)
- OpenStax Anatomy & Physiology 2e Online: <https://openstax.org/details/books/anatomy-and-physiology>

Course Description:

This class is an introduction to Human Anatomy - the structures of the body- and Physiology - how those structures work. This class will build on your understanding of the human body through dissections, readings, drawings, projects, quizzes and tests. We will all be learning the language of human anatomy as we learn together. This class has the option for dual credit (4 credits) through Oregon Institute of Technology (OIT). Signup for dual credit will be available in December or January of Semester 1.

Grading Policy Description: I measure your growth towards course learning goals in different ways. Assignments are placed into 3 different categories:

1. **Classwork and Homework** makes up 20% of grade.
 - Includes: daily work, notes, homework, practice quizzes
2. **Labs, Dissections, and Case Studies** make up 20% of your grade.
3. **Mastery** makes up 60% of your grade. Includes **Unit tests, Quizzes, Midterm and Final Exam**
This is where you show what you have learned on summative assessments.
Remember to prepare ahead of these assessments so that your score reflects what you know!

Grading Scale: To pass this class you must earn at least a 60%. This is a weighted class, where you can earn Honors credit weighted grades. A grade of a D passes but does not earn a weighted grade.

100%-90% (AH) 89%-80% (BH) 79%-70% (CH) 69%-60% (D) Below 60% (F)

Retake/ Late Work Policy: The purpose of assigning grades is to accurately and fairly communicate your progress towards course objectives. There will be deadlines to hit as we work together to complete labs, projects, and Mastery assessments.

- There will be no make-up of quizzes, however, students will be allowed to drop their lowest quiz score.
- Unit tests are an opportunity for students to demonstrate their learning at various points throughout the school year. If you know ahead of time that it is unavoidable that you will miss a unit test, arrange to take it **before** it is given to the class. Any missed unit test will score 0 points and the makeup test must be completed within one week of the exam date. There are no retakes on unit tests.
- All students will take a cumulative midterm and final at the end of each semester. There is no retake or make up for these exams.
- You can turn in late work but remember that daily work prepares you for the next day and for Mastery assignments. Falling too far behind may make it hard to complete or do well on a mastery test or project.

1. Late work will be docked 20% and will not be accepted two weeks past the unit test. Turning work in **on time** is essential to success in this class.
2. *If you miss a class, please check Schoology, with me, or with a classmate for the work and complete it on your own.*
3. Some assignments, usually labs or dissections, must be made up before or after school or during lunch.

Course Schedule/Outline of Units: This course is an introduction to Human Anatomy and Physiology. We will be covering the following units, which may change as needed.

Dates	Unit/Topic
September	Unit 1: Organ Systems and the Language of Anatomy
October	Unit 2: Cells and Tissues of the Body Unit 3: Skeletal System
November	Unit 3: Skeletal System Unit 4 Muscular System End of Quarter 1: November 8 th 2023 Semester 1 Conferences: Nov 21 st – 22 nd
December	Unit 5: Digestive System (unit exam on midterm)
January	Unit 6: Endocrine System (unit exam on midterm) Midterm Final End of Semester 1: Jan. 24-26 th 2024
February	Unit 7: Blood and Cardiovascular System Unit 8: Respiratory System
March	Unit 8: Respiratory System Continued Unit 9: Nervous System Spring Conferences: March 21 st - 22 nd
April	Unit 9: Nervous System Continued Unit 10: Senses End Quarter 3: April 11 th
May	Unit 11: Lymphatic System and Immunity Unit 12: Urinary System and Reproduction
June	Unit 12: Urinary System and Reproduction Continued Final Exam: June 11 th – 13 th 2024, (Last day for Seniors = June 6 th)

Class Expectations (i.e. POWER):

1. **PREPARED** and **PUNCTUAL**: Come to class every day, on time and ready to learn!
2. **ORGANIZED**: Try to turn in assignments and homework on time. Get help from me before an assignment is due – after school, 1st or 2nd lunch (talk to me!)
 - Keep all of your older work in your binder or folder by unit. This will help you review units to prepare for the Midterm Exam and the Final Exam
3. **WRITE**: Listen and speak to others but do your own best work. Copied work will not receive credit.
4. **ENGAGED**: Most of the learning takes place in class, so PARTICIPATE 100%.
 - Use of Chromebooks and phones in class will be determined by a Red or Green sign. Green means phones or Chromebooks for academic use are allowed, Red means phones are off and away.
5. **RESPECT**: Show respect to everyone. Be respectful of your classmates' space and belongings and of my room. Be safe especially during labs.
 - No food (drinks are okay in a sealed container) – we have mice!
 - Be safe during labs and clean up after yourself and others.
 - Please work bell to bell. Our time together each day is short.
 - Bathroom: 10/10 rule – not during first or last 10 minutes of class. Planners are your pass.

Repairing Relationships: I look forward to working together as a class to create and maintain a safe and learning-focused environment. When we run into difficulty (and we will) I will check in with you, your peers, your counselor, and your family to see how we can work together to maintain our respectful classroom environment. Every day holds opportunities to grow, learn, trust, and build relationships.

I have read and I understand the course syllabus, class requirements, and student expectations.
