

## LANGUAGE: SEQUENCING SKILLS

*DID YOU KNOW?*

(FROM SUPER DUPER PUBLICATIONS)

- Sequencing is the process of putting events, ideas, or objects in logical order.
- Having this skill allows children to see the relationships between cause/effect and actions/consequences
- Beginning readers need this skill in order to recognize small differences in the letter order of words.
- Encourage children to orally tell the story as they put pictures in order. Use the words "First, Next, Last" to reinforce sequencing!
- The importance of understanding a beginning, middle, and an ending is essential when writing and telling stories!
